DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-17, 35, drawn to a refinish basecoat composition, classified in class 523 subclass 501
- II. Claims 18-23, drawn to an intermix system, classified in class 524, subclass 507.
- III. Claims 24-32 and 34, drawn to a method of refinishing substrate and a substrate prepared by the said method, classified in class 427, subclass 407.1.
- IV. Claim 33, drawn to a hydroxyfunctional acrylic polymer, classified in class526, subclass 320.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention drawn to a basecoat refinish composition has separate utility such as coating for automobiles, etc, because it contains suitable binder and pigment. See MPEP § 806.05(d).
- 3. Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

Page 3

Application/Control Number: 09/886,742

Art Unit: 1713

process of using that product (MPEP § 806.05(h)). In the instant case the conventional steps of method of refinishing a substrate, can be utilized with any bother basecoat composition, such as, for example, one having acrylic polymer as a binder, a polyol component and polyisocyanate crosslinking agent.

- 4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions invention of using a composition refers to a composition of group I and is not disclosed as capable of being used with a composition of Group II.
- 5. Inventions IV and I or IV and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product a hydroxyfunctional acrylic polymer comprising a cycloaliphatic monomer and having specified molecular weight is deemed to be useful as antireflective coating for semiconductor wafers, or as a component for photoresist compositions, and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In

Application/Control Number: 09/886,742

Art Unit: 1713

either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 6. Inventions IV and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions The polymer is not the compound that is used for coating a substrate, and therefore these two groups of inventions are not disclosed as being capable of use together, and therefore, they have different modes of operations, different functions and different effects.
- 7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 8. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II-IV, restriction for examination purposes as indicated is proper.
- 9. A telephone call was made to Ms. SABOURIN, ANNE G. on August 4, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. In response to Ms. Sabourin's message about the restriction requirement after RCE request, Applicants' attention is drawn to MPEP 811, 811.02, 811.03, 811.04 and 811.05.

Application/Control Number: 09/886,742

Art Unit: 1713

Applicant is advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement

be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by

a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Tatyana Zalukaeva whose telephone number is (703)

308-8819. The examiner can normally be reached on 9:00 - 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David Wu can be reached on (703) 305-2450. The fax phone number for

the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (703) 308-

0651.
